DASH and ProQuest Licensing FAQs

What does the Author Agreement do?

The Author Agreement, which is also applied to Harvard faculty work, grants the University a non-exclusive license to preserve, display, and distribute your work from DASH, the University’s digital repository. By consenting to this license you also warrant that you are not infringing on the copyrights of others, that you have secured permission for the use of others’ work where necessary, and you have fulfilled any sponsorship agreements to which you may be subject. You still own the copyright to your work.

Do I need to register my copyright?

Your work is protected by copyright as soon as it is created in a fixed form, and you are not required to register your copyright with the U.S. Copyright Office to enjoy protection for your work. However, if you chose to do so, you may register your work with the Copyright Office here.

What if I have patentable material in my thesis?

If you have not yet done so, please contact the Office of Technology Development, which is where you may complete a Report of Invention form. If you have already filed for a patent then you do not have to take any other action.

What if I want to publish my work as a book or journal article?

Because the Author Agreement is a non-exclusive license it does not constrain your ability to publish your work elsewhere.

What if part of my thesis includes work I published elsewhere previously?

If your thesis includes work that you published already, then you will need to review your publishing agreement. If you do not have permission to reuse your own work, then you may need to secure permission from the publisher to do so.

Why do I have to agree to two licenses?

Your school has a relationship with ProQuest – a vendor that indexes theses and dissertations. In order to make your work available and searchable in their database you will need to agree to their non-exclusive license.

What if I have questions about any of this?

Please contact the Office for Scholarly Communication’s Copyright Advisor, Kyle Courtney.
